

SAY HELLO TO YOUR NEST®

As part of our commitment to energy efficiency, your home will be equipped with a 3rd gen Nest Learning Thermostat. Here are some of the features of your Nest. For more detailed features and functionality, visit nest.com/thermostats.

The Nest Learning Thermostat is the first thermostat to get ENERGY STAR certified. It learns what temperature you like and builds a schedule around yours.

10:30 PM

G'night, Nest.

You turn down the heat on your way to bed. Nest takes note and starts building your schedule. Cozy in the afternoon, cool at night. Check.

7:00 AM

A warm welcome.

After you turned up the heat a few days in a row, Nest learned you like eating breakfast at 70°. So now it warms up the house as you get out of bed.

8:30 AM

It knows when you're away.

You're off to work. The Nest Thermostat can use sensors and your phone's location to check if you've left, then sets itself to an Eco Temperature to save energy.

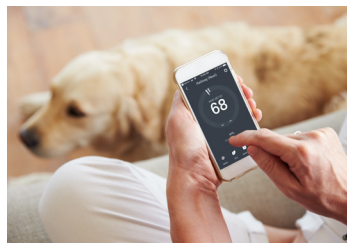

It lights up when you walk in the room.

Now the Nest Thermostat does something new. It's called Farsight, and it lights up to show you the temperature, weather or time. You can even choose a digital or analog clock face. Farsight is big and bright on the beautiful display – you can see it from across the room.

Explore the Nest app.

With the Nest app, your thermostat will live on your wall and in your pocket. Once you connect your thermostat to Wi-Fi, you can control it from anywhere. Adjust the temperature from the app, and the Nest Thermostat adjusts quickly back at home.
